SPV Group in conjunction with Juniper Training are setting up a Training Academy in August 2019 offering a Roofing & Cladding Vocational Pathway.

We will be offering everything that students need to start their career in construction and become work ready. We will be offering 2 types of training courses which will be carried out between the SPV Head Office, this will be where all practical training will be undertaken, and the Juniper Training centre in Walsall, where English, maths and employability training will be completed.

Construction Study Program for 16-18 year olds
This will be an introductory course for young people to have access to a quality provision offer to decipher if they want to work in the industry. It will be a 24 week programme -1 day construction theory, 1 day workshop (simulated activity with rigs etc), 2 half days Maths, 2 half days English, half day PDBW, and half day employability. They will achieve a Level 1 Introduction to Construction Qualification.

Attendees who complete this will be site ready having learnt practical Roofing/Cladding techniques, Level 1 or 2 English and maths qualifications and they will have completed manual handling training, working at height training, asbestos awareness training and be in possession of a CSCS card.

There will be 2 intakes per year; one in August 2019 and one in February 2020 with 15 starts per intake. The highest calibre students with a genuine interest to work in the industry progress onto an Apprenticeship.
